"THE ONE PAPER IN MOST HOMES--THE ONLY PAPER IN MANY HOMES"

VOL. LXII.

HICKMAN, KENTUCKY, THURSDAY, MARCH 2, 1922.

NO. 38.

ENTER PROTEST ON ASSESSMENT RAISE

Fiscal Court Met With State Tax Commission Yesterday.

County Judge Chas. D. Nugent, Magistrates Henry Pollock, Lawrence Combes, Tom Attebery and S. A. Hagler, representing all four districts of the county, and County Clerk O. C. Henry left Monday night for Frankfort, where they were scheduled to meet Wednesday with the State Tax Commission for the purpose of discussing an adjustment in the assessment of Fulton County property for taxation. This commission in a meeting two weeks ago placed a tentative raise of \$450,000 on the tax assessment for Fulton County, a raise which in view of the increases which have been added to the assessment of this county in recent years is thought not only by the court but by the vast majority of the people of the county to be unjust.

These gentlemen who are in Frankfort in an endeavor to secure a fairer settlement of the county's assessment are armed with voluminous statistics and records which they will use as arguments with the commission against the raise planned in the county's assessment. Judge Nugent and Mr. Henry have spent the greater part of the past two weeks in going over the records of the county and preparing the statistics, which show the actual price of some of the land of the county when sold as compared with the tax assessment on these lands. In many cases the former price is one half of the latter, and a majority of the instances show a sale price either about equal or slightly above the tax valuation, these cases being taken from the 1921 and 1922 records.

A comparison of the assessment of Fulton County land as compared with that of other counties in this district gives a still better idea of the injustice of a further raise in the assessment. The average assessment of land in these counties per acre is as follows:

Fulton County	\$44.53
Hickman County	38.81
Graves County	38.56
Carlisle County	35.33
Billard County	38.79
McCracken County	40.26
Callaway County	29.19
Marshall County	22.28

Thus we see that Fulton County land is assessed an average of \$4.27 higher than any other in the district, and this is in spite of the fact that in this county there are 25,000 acres of waste land and land subject to overflow. In the river bottom above Hickman there are about 12,800 acres subject to overflow. About 6,500 of this land can be cleared and put in cultivation, some being already cleared. The cleared land is assessed at \$20.25 per acre. Six thousand acres assessed at \$10.00 an acre is in creeks, lakes and ponds, and cannot be cultivated unless drained and leveled. In the county there are about 12,200 acres of waste land in bluffs, hills, lakes, ponds and creeks that can never be cultivated, and this land is assessed on an average of \$44.53 per acre. The Little Bayou de Chien Drainage District contains 2,000 acres by survey assessed at \$44.53 per acre, in addition to a tax of 50 cents per acre for drainage, with more to be added. In the Blue Pond Drainage District there are 4,360 acres by survey which also has the same assessments and extra taxes. The Fulton County levee protects 27,500 acres on which there is an acreage tax of 50 cents per acre, 50 cents per \$100 on assessments in addition to county, state, road and school taxes.

These facts when brought before the tax commission should have great weight with that body, and ought to have the effect desired.

Certainly the time has about come when an end could be made to the perennial raise which is placed on the land of this county, for since 1917 the assessments on land has been raised from \$2,507,975 to \$4,687,605 or nearly double.

The fiscal court is in Frankfort to fight for a reduction in the assessments and we may rest assured that they will put up a stiff fight. What the results may be remains to be seen.

LEAVES FOR ILLINOIS.

Gus Alexander leaves the latter part of this week for Litchfield, Ill., where he will install a Coca Cola bottling plant. He has secured the Coca Cola franchise for two and a half counties in Illinois, having the sole right for manufacture and wholesale trade in this popular beverage. Gus has been a resident of this city all his life and is a good fellow in every sense of the word. He has a host of friends here who will wish him every good fortune in his new enterprise. Mrs. Alexander will join him at Litchfield in the near future.

Miss Vera Mayes, accompanied by her mother, Mrs. Mayes, went to Nashville, Thursday afternoon of last week to St. Thomas Hospital, where she underwent a serious operation Saturday morning. She is reported as doing nicely. Miss Mayes, who was a teacher of Hickman College, was forced to resign some time ago on account of her health.

Will Huff writes from the M. W. A. Sanatorium at Woodman, Colo., that he is improving rapidly and expects to return home in four or five months.

C. M. Walts was in Louisville the latter part of last week.

SUB-STATION BEST HICKMAN CAN GET

Capt. Stevens of Air Service Here Friday Inspecting Fields.

Capt. A. W. Stevens of the engineering division of the War Department Air Service, accompanied by State Geologist Nelson, of Tennessee was here Friday on a tour of inspection of the landing fields offered by the various towns in the Reelfoot Lake section.

The air service contemplates photographing some 300 square miles of this region and was seeking a place for headquarters while in this section. It developed that the country around Hickman was too irregular and the soil of such a nature that a regular landing field would be impracticable here and it is thought that a suitable place for an emergency landing field will be selected from those he had shown. Union City will probably be selected for the headquarters, Captain Stevens said.

The air service photographers will take the pictures at an altitude of about 18,000 feet, and in each picture about five square miles will be shown, a 400 H.P. DeHavilland plane being used in making the flights. These planes require a stretch of land for landing purposes unbroken by ravines and irregularities for such a distance that Captain Stevens was unable to find a suitable place near this city.

Captain Stevens and Mr. Nelson also visited Tiptonville Friday, returning to Hickman that night. They left here Saturday morning.

KENTUCKY ROAD BILL WINS SENATE TEST

By a vote of 22 to 13 the Senate Monday sent the Moss-Meyers \$50,000,000 road bond submission bill to first reading after it had been reported "without expression" by the committee on rules. This lineup, regarded as a test of strength on the bill, was as follows:

For first reading: Atwood, Baker, Branstetter, Brock, Davis, Denny, Dycus, Evans, Garner, Green, Harris, Haselden, Kinne, Metzger, Monroe, Moss, Ryans, Simmons, Tabor, Wallace, Watts, White, Whiteaker--22.

Against first reading: Bell, Bright, Caywood, Daugherty, Hall, Hubbard, Kelly, Marshall, Perry, Rash, Reynolds, Stoll, Welch--13.

When the Senate rules committee met Senator Whiteaker moved, seconded by Senator Atwood, to report the bonds bill favorably. The committee voted eight to four against such report, Senators Points and Simmons voting to bring it out.

However, Senators Davis and Green had served notice on the rules committee that unless the bill was reported they would join in an effort to order it to first reading, regardless of the attitude of the committee. They were supported by Senators Dycus, Whiteaker, Atwood and Lee, while Senators Simmons and Points also took the stand that the bill should be brought out for the decision of the Senate. Consequently the committee agreed to report the bill without expression, which would require a majority of those present and voting to order it to first reading, and not the 20 votes necessary to take a bill away from the rules committee.

The action of the committee in yielding gracefully prevented any parliamentary battle over the question of bringing the bill out and the measure was given first reading Monday.

The vote is taken as an indication that 16 of the 17 Republicans will favor the bill for passage. The measure was forced out by the pressure exerted by the four Democratic senators from the First congressional district. Senators Davis, Atwood, Green and Dycus, aided by Senator Whiteaker of the Second district, who favored first reading, Senator Simmons, was always regarded as doubtful on this issue and his support had been claimed by both sides. If all five of the others mentioned, plus the 16 Republicans, remain steadfast for the bond bill, it will pass with one vote to spare, requiring 20 votes for passage.

The House rules committee also reported favorably the Strange oil tester and gauger bill, which is designed to do away with the present system of oil inspectors, a caucus of House Democrats (with a number of absentees, however) having previously voted to favor this measure. Oscar Vest, author of another bill aimed at the abolition of the oil inspector's office, was not present.

The same committee gave first reading to the Hall bill to appropriate money for the completion of the monument to Jefferson Davis at Fairview.

Mr. and Mrs. George Collins returned the first of the week from California, where they have been for several weeks. They will return in the early spring.

Dennis Cloar, who has been on a two or three weeks' trip to Texas and Oklahoma, writes that he is doing well and will soon be home.

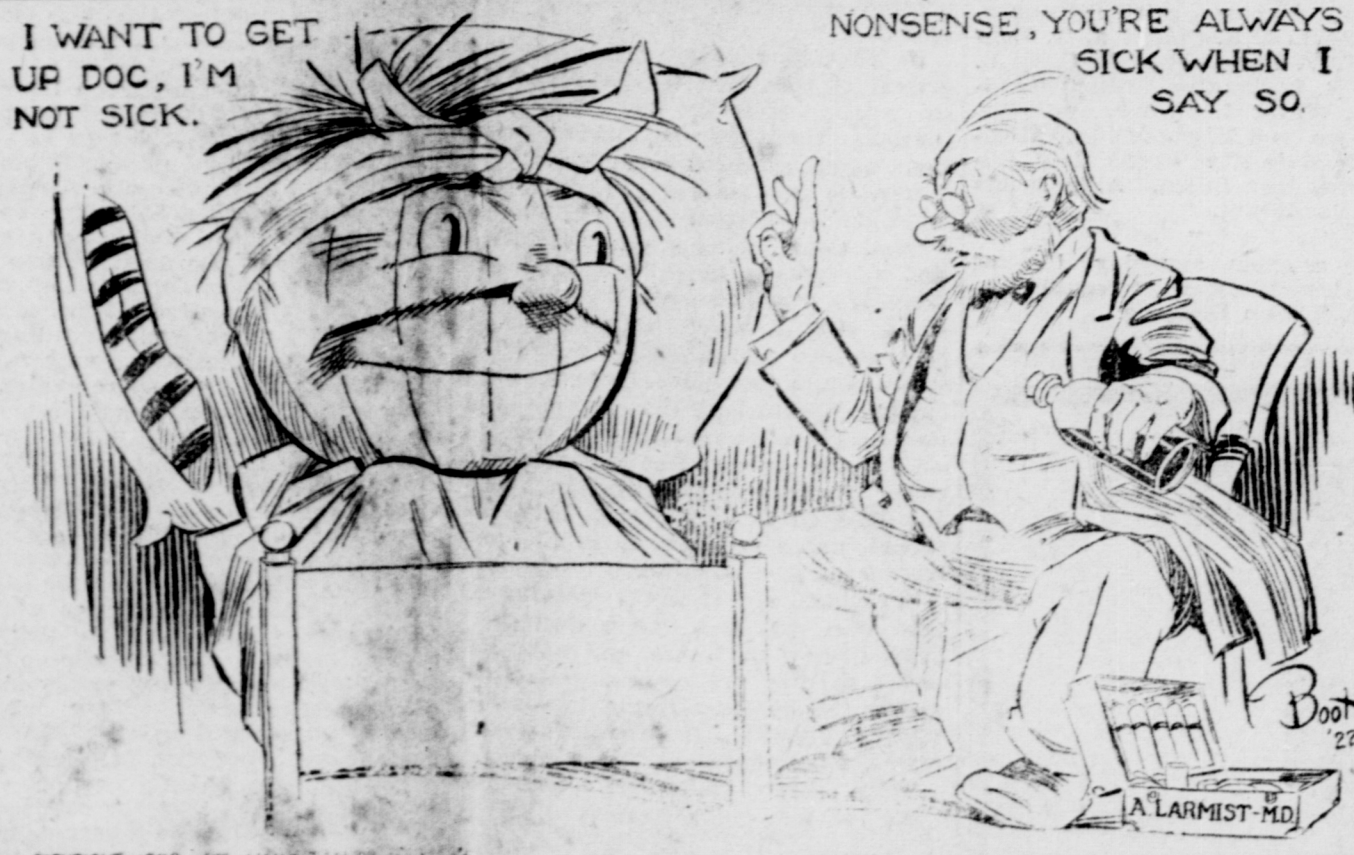

Mrs. W. C. Wallace of Caneyville, Ky., spent last week with Mr. and Mrs. C. B. Whalin, returning home Saturday.

Mrs. Joe Engle has been visiting in Cairo a few days the past week.

E. R. Ellison is in St. Louis buying goods for his store this week.

Mrs. Harold Rice is able to be out after a recent illness.

MASONS DEDICATE THEIR NEW HOME

Past Grand Master Adams Here on Two Gala Nights.

The Hickman Lodge, No. 761, F. & A. M., dedicated their beautiful new home in the old city hall building with two interesting meetings Monday and Tuesday nights.

Meeting with the lodge on both occasions were Past Grand Master Adams and H. M. Reese, both of Louisville. Bro. Adams, aside from the honor which is his through his former occupancy of the highest office among Kentucky Masons, is at present the superintendent of the Masonic Widows and Orphans Home, located in Louisville, a position which carries with it great responsibility. For a long term of years he has been prominently connected with the affairs of the fraternity, filling many other responsible positions aside from the two mentioned above. Bro. Reese, one of the most venerable Masons in Kentucky, both in age and length of service is a director of the Masonic Widows and Orphans Home and in other positions has important duties in connection with the Masonic work in Kentucky.

Monday night the lodge met in business session at which short addresses were made by both the distinguished visitors. On this occasion over \$1,100 was subscribed for the expense incurred in fitting up the new home. After the business of the evening was concluded, work was had in the Master's degree, three candidates receiving this degree. The lodge was assisted in giving this work by both Bro. Adams and Bro. Reese. The addresses of these visitors and the lecture by Bro. Adams were greatly enjoyed by every member of the lodge and the visitors from other lodges who were present to the number of fifteen or twenty.

Tuesday night was devoted to an open house—a regular housewarming celebration—at which Masons, their wives, and members of the Eastern Star, were present. In spite of the extreme inclemency of the weather nearly one hundred were present.

On this occasion a short talk was made by Bro. Reese, while Bro. Adams delivered a most interesting address on Masonic work and history, and many interesting but in the majority of cases little known facts were presented. One of the points most salient to the Hickman people present was that the Order of the Eastern Star was first founded by the famous "Old" Mason, Robert Morris, in Hickman. Facts of interest like this and many other points on Masonic work and history made the address highly enjoyed and profitable and kept the speaker's hearers in rapt attention during the whole of it.

Aside from the set addresses talks were also made by several of the local Masons, and after this part of the program another highly enjoyable feature was enjoyed, namely, the refreshments, which had been prepared by the ladies of the Eastern Star. These consisted of pineapple and peaches with whipped cream, cake, and coffee or hot chocolate. After the refreshments the remainder of the evening was spent in conversation until a late hour.

The Masons of Hickman and their guests highly enjoyed both evenings of work and entertainment, the pleasure of both evenings being added to by the visits of the two distinguished members of the order.

This is Bro Adams' third visit to the Hickman lodge, and he has many intimate acquaintances among the fraternal order in this city, and his genial personality and wealth of knowledge on things Masonic added many more to this list. Bro. Reese was making his first trip to Hickman, combining the visit to the lodge with a visit with his son, George Reese, who has been here for some time connected with the A. B. Smith Lumber Co. The visits of both were highly enjoyed and the Hickman lodge will welcome them back whenever they can return.

EMBALMER AT BARRETT & LEDFORD'S

John Pitts, of Fayetteville, Tenn., arrived this week to take the position as embalmer at Barrett & Leford's undertaking parlors. He is an expert embalmer with much experience in this line of work, and this enterprising furniture and undertaking establishment is indeed fortunate to secure his services. Mr. Pitts is a young man of pleasing manners and personality and has made some warm friends here in the few days that he has been in the city.

E. A. Hammond has returned from Bradford, Tenn., where he attended the funeral of his uncle, John Wren.

The Woman's Club will have a business meeting at the LaCade Hotel Saturday afternoon at 4 o'clock.

Oscar Sliger of Louisville, who spent part of last week here, went to St. Louis Friday night.

Mrs. B. S. Elliott, who has been very sick for the past three weeks is reported as improving.

Judge W. B. Amberg was in Nashville the latter part of last week on business.

The region drained by the Colorado river has been styled the Asia Minor of America.

GAVE WASHINGTON BIRTHDAY PARTY

One of the most delightful affairs of the winter was the Washington Birthday party given on last Wednesday afternoon from 2:30 to 5:30 by Mrs. Nim Walker in honor of her daughter, Mrs. Grant Delph of Atlanta, Ga., entertaining at eleven tables of bridge. The tally cards were suggestive of the day, hand painted in red cherries and cherry foliage, the suggestion of the day being uniquely carried throughout in every other detail. Candy was served during the games, followed by a two-course

menu, consisting of salad-course and coffee, each plate garnished with twigs of red candy cherries, and a second course of brick cream, angel food block cake and mints. The cream had a tincture in bright red, flavored with the cherry flavor, frozen through the center, and cake was keel in red cherries and foliage, with the mints in green and red. The guests were Mesdames H. L. Slade, DeWitt Reid, C. L. Walker, Fletcher Waters, W. B. Amberg, C. M. Reynolds, Mollie Prather, T. T. Swayze, F. S. Moore, J. M. Hubbard, H. N. Cowgill, Sr., H. N. Cowgill, Jr., A. A. Faris, Edward Prather, Jr., Swayze Walker, Dee McNeill, E. R. Prather, Sr., B. G. Hale, Jr., W. H. Baltzer, Jessie Dillon, S. D. Stenbridge, Delbert Choate, J. M. Calvin, E. J. Stahr, E. D. Johnson, C. B. Travis, J. T. Stephens, C. G. Schlenker, J. Mack Reid, R. B. Coffee, C. T. Bondurant, W. F. Renneberg, E. Case, L. A. Stone, R. L. Bradley, Milton Spradlin, C. M. Walts, I. Horine, and Mrs. Dr. Morrison and Misses Mildred Ramage, Bertie Male Rice, Frank Reid, Eunice Burrus, Inez Luton, Allie Dodds and Nell Bondurant.

For the common, everyday ills of mankind there is nothing equal Tanlac.—J. C. Ellison Drug Co.

PURITANS IN FOOLISH FIGHT

Starn Old Men of Long Ago Had Silly Idea They Could Prevail Against Dame Fashion.

Dress reformers of the present day, who deplore the abbreviated skirt and peek-a-boo waist, may be astounded to learn that even in the good old puritan times the lure of Dame Fashion had a bewitching effect on the young men and maidens.

Researches into the ancient laws of the Massachusetts Bay colony have revealed that the fathers had their own troubles with their offspring, who recognized a snappy style when they saw it.

In 1634, just four years after the arrival of Governor Winthrop's ships, the apparel question had become so pressing that the lawmakers tried their hands as fashion molders.

Here is the statute placed on the books in its original wording:

"The Court, taking into consideration the greater, superfluous and unnecessary expenses occasioned by reason of some new and immodest fashions, as also the ordinary wearing of silver, gold and silke laces, girdles, hat bands, etc., hath therefore ordered that no person, either man or woman, shall hereafter make or buy apparel, either woollen, silke or linnen, with any lace on it, silver, golde silke or threed, under the penalty of the forfeiture of such clothes.

"Provided, and it is the meaning of this court that men and women shall have liberty to wear out such apparel as they are now provided of, except the immoderate great sleeves, slashed apparell, immoderate great rayles, long wings, etc.

"This order to take place a fortnight after the publishing thereof."

Tires on Jinrikishas.

While automobiles are still rare in China, owing to the lack of proper motor roads, it is interesting to note that improvements have been made to the popular vehicle of the country, the jinrikisha, and that in the larger towns and villages it is now equipped with rubber tires. The common rikisha is a two-wheeled vehicle drawn by Chinese coolies and suitable for seating one person. In Tientsin it is estimated that there are between 10,000 and 12,000 public and 1,000 private rikishas in use, and in Peking 23,000 public and 3,000 private rikishas.

Doll's Heads Electrically Baked.

Japanning ovens, electrically heated, are now used by numerous automobile factories, as well as other industries. Such ovens will bake anything requiring the treatment, from cores to dolls' heads. The race of dolls especially is improving by electrical treatment.

LONGEVITY PEAK NOT ATTAINED

Man May Live 2,000 Years, Says New York Scientist

The leader in American life today lives twenty years longer than did the leaders of ancient Greece and Rome, says Dr. A. J. Barker Savage, superintendent of the Broad Street Hospital, New York. Modern man does not attain the peak of his activity until an age when the leader of old was already in his grave. The interval of his most successful effort is longer than was the case with men who flourished in the years before and just after the coming of Christ, says Chester E. Tucker in the Boston Transcript.

Dr. Savage, in a study on longevity which he has just completed, compares the present ages of such men as William L. Douglas, John Hays Hammond and William A. Gaston with the ages at death of Archimedes, Demosthenes and Pompey. He finds that the average age at death of the ancients was 55.7 years, while the moderns, all of whom are living at the present time, already average 63.8 years, and, according to life insurance statistics, may reasonably expect 10.5 years more of life. In other words, Dr. Savage figures that the moderns will die at an average age of 74.3.

The doctor has taken forty-one Greeks and Romans, most of them selected by Pintarch as the leaders of the ancient world, and forty-one Americans, selected by B. C. Forbes as the leaders in the business and finance of this country today, and compared their life spans. He has reached the opinion that the struggle for supremacy in this country today is not killing off the leaders in our national life. He has come to the belief that Dr. Woods Hutchinson came to about a year ago—that the faster that kills is the slower you die.

Here is what Dr. Savage has to say about it:

"The intensive concentration of American life has not brought about early deaths of those who had to struggle for success. The average length of human life is now probably about 50 years. In the sixteenth century the best estimate that is to be had of it places it at 19 years; at the close of the eighteenth century it was a little more than 30 years, and now it has so increased that we shall have to readjust our definition of the length of a generation.

"But we have not yet reached the maximum in longevity. The prediction of living to be 2,000 years old may be that of a visionary, but it is certain that on top of our present span of life fifteen more years might easily be added by proper attention to health and the signs of illness.

"Attention to health, assisted by medical and surgical advice, has already brought about a lowering of the death rate in the past and the increasing of the span of life. Pronounced declines in the death rate in recent months are to be found for influenza, pneumonia, tuberculosis, organic heart disease, cerebral hemorrhage, Bright's disease, and especially for deaths from conditions incidental to childbirth.

"The result is that not only is death coming later, but the period of most successful activity is coming later in life and is longer. Once 40 or 45 years was the age at which a man was considered to be at the height of his career. Sir William Osler was reported to have said that it would not make much difference to the progress of the world if men were chloroformed when they attained the age of 60. In the group of forty-one Americans selected for their success in business by B. C. Forbes only two are less than 50, and of the others none would have appeared on such a list when they were only 50."

CALOMEL GOOD BUT TREACHEROUS

Next Dose May Salivate, Shock Liver or Attack Your Bones

You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tonic for a few cents, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

Don't take calomel! It makes you sick the next day; it loses you today's work. Dodson's Liver Tonic straightens you right up and you feel great. No salts necessary. Give it to the children because it is perfectly harmless and cannot salivate.

Vanishing Languages.

Nowhere in America has there been such a diversity of Indian languages as in California. But these languages are now rapidly disappearing. Several of them are known only by five or six, and others only by twenty or thirty living persons, and hardly a year passes without some dialect, or even language, ceasing to exist through the death of the last individual able to speak it. Efforts are being made to record all these languages for the sake of the light they throw on the ancient history of the Pacific coast.—Washington Star.

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a general Strengthening Tonic to the whole system. Nature will then throw off or dispel the worms, and the Child will be in perfect health. Pleasant to take. 60c per bottle.

Notice is hereby given to all owners of land and other persons in said district known as Blue Pond Drainage District, the boundaries of which district are as follows:

"Beginning at the N.E. corner of the S.W. Qr. of Sec. 16, T1, R5 West, thence South 3 E. 639 feet, thence S. 47 30 W. 2000 feet, thence S. 49 30 W. 2290 feet, thence S. 47 W. 7690 feet, thence S. 10 30 E. 525 feet, thence S. 30 W. 4850 feet, thence S. 42 W. 3325 feet, thence S. 31 335 feet to a point in the State Line between Kentucky and Tennessee, thence with the State Line N. 88 15 W. 11025 feet, to the center of Big Slough, thence with Big Slough, N. 15 E. 468 feet, thence N. 5 30 E. 700 feet, thence North 1 30 E. 490 feet, thence N. 7 E. 400 feet, thence N. 12 30 E. 1178 feet, thence N. 7 30 W. 100 feet, thence N. 9 30 E. 690 feet, thence N. 5 W. 467 feet, thence N. 25 E. 300 feet, thence N. 15 30 E. 496 feet, thence N. 13 E. 248 to a stake on the east bank of said Big Slough, thence N. 52 E. 4150 feet, to a point in C. T. Bondurant's south boundary line, thence north 89 E. 2700 feet to a stake in C. T. Bondurant's south boundary line, thence N. 12 30 E. 3610 feet to the south boundary line of the C. M. & G. R. R. right-of-way, thence with said C. M. & G. R. R. right-of-way, N. 69 E. 17985 feet to a point of curve of said right-of-way, thence with said curve about 500 feet to the intersection of said right-of-way and the line between the center of section 16 and section 17, T1, R5 West, thence E. 500 feet to the beginning point; said body of land contains 4360 acres, more or less."

And to all persons whose property is or may be affected, whether the same be inside or outside of said district, that the Board of Appraisers heretofore appointed herein has filed in the office of the Clerk of this Court their report in which the said board of appraisers states and shows the benefits, damages, and the assessments of benefits made upon and against the several tracts and parcels of land and other property located in said district, the classifications thereof and their appraisal of the value of the several parcels of land necessary to be taken for rights of way, holding basins, pumping stations and other work of said district, both within and without said district, or which will be affected by the making of said improvement. Said proceedings are set for hearing on the second Monday, the 13th day of March, 1922, same being the first day of the next regular March Term of this Court. Said report is on file in my office and subject to inspection by all persons whomsoever. All persons desiring to file exceptions thereto are required to do so on or before the 13th day of March, 1922, same

being the first day of the next regular March Term of said court. Your failure to file exceptions to said report on or before the above named date will be construed by the Court that you have no reasons to offer why said report should not be confirmed.

Done by me as Clerk of the Fulton County Court, on this, the 27th day of February, 1922.

O. C. Henry, Clerk.

P-T. A. NOTICE.

There will be a special call meeting of the Parent-Teachers Association on Friday afternoon at 3 o'clock to discuss some important matters.

There will also be given a miscellaneous shower for Prof. and Mrs. T. H. Likens, whose household goods were destroyed in the recent fire at Mr. Burrus'. All friends of the Association are invited to take part in this shower at 3:30 o'clock Friday afternoon at the Library.

Mrs. O. L. Cunningham,
President P-T. A.

For Rent—Furnished rooms for gentleman. Call No. 2.

George Baker of Lawrenceburg, Ind., is in the city drilling a deep well for the Mangel Company. This is being put in at their veneer plant and is one of their fire protection wells.

FOR SALE—White Cochon Bantams. Good layers and excellent little mothers.—Margaret Johnson, 910 Troy Ave. 2p38.

Mrs. Grant Delph returned to Atlanta, Ga., Thursday, after a few days' visit with her parents, Mr. and Mrs. Nim Walker.

ONLY CURE FOR A TENNESSEE RIVER CHILL

Dr. J. T. Henslee & Son, Blood, Ky., write: "We carry in stock Mendenhall's Chill Tonic, black label without arsenic and red label containing arsenic and are having big sales on same. Mendenhall's is the only Chill Tonic that gives a complete cure for a Tennessee River Chill. Chill Tonic, black label is a pleasant substitute for quinine. The properties of arsenic are set down in medical books as follows: "Most successful agent in the treatment of chronic malaria, malarial or bilious fever, intermittent fever or chills, brow ache, neuralgia, headache or rheumatism due to malaria or general bad health. Increases the appetite, digestion, weight and strength of the patient and has great power to improve the condition of the blood. It is one of the few substances which deserve the name of a general tonic. Inactive liver and spleen functional nervous disorders with malnutrition and anaemia are benefited by its use."

TAKES COFFIN TO ITALY

The American born Duchess of Oporto, whose husband was a member of the royal family of Portugal, sailed Friday by the Italian liner Tamorina for Naples, carrying with her what was said to be the most ornate and costly casket ever shipped from the United States. She arrived incognito three months ago by the Aquitania. The casket, packed in a case as large as an ordinary automobile case, was hoisted on board just before the ship left the Fifty-seventh street pier.

The Duchess explained that her visit to the United States, which has been surrounded more or less in mystery, was for the purpose of having the casket for the husband made. She said: "As the body of my late husband, who also was Prince of Braganza and was next in succession to the throne of Portugal after King Manuel, is to lie forever in state in the Pantheon in Lisbon, I wished to have it in a suitable casket and certainly I could not find the makers I wished in Europe. Now I am taking it with me to Naples, and on my birthday, October 21, the body of my husband will be taken in it on board an Italian warship and conveyed to Lisbon."—New York Herald.

A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c.

Actual documents and copies of Aztec history are available to the history student of today.

For Sale—Lots on Dresden Road.—Swan Burrus. 2c38

will break a Cold, Fever and Grippe quicker than anything we know, preventing pneumonia. 24-15c

Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important. "The only medicine I have needed has been something to aid digestion and clean the liver," writes Mr. Fred Ashby, a McKinney, Texas, farmer. "My medicine is

Thedford's

BLACK-DRAUGHT

for indigestion and stomach trouble of any kind. I have never found anything that touches the spot, like Black-Draught. I take it in broken doses after meals. For a long time I tried pills, which gripped and didn't give the good results. Black-Draught liver medicine is easy to take, easy to keep, inexpensive."

Get a package from your druggist today—Ask for and insist upon Thedford's—the only genuine. Get it today.

GUESSES MANY AS TO AGE OF HUBBY-TO-BE

Mathilde McCormick, 16-year-old daughter of Harold McCormick, of the International Harvester Co., and grand-daughter of John D. Rockefeller, has gained consent of her parents and the announcement made of her engagement to Max Oser, Swiss riding master. Guesses are now many as to Oser's age. Some say 57, and others 48.

About 100 feet of sidewalk and about half of the street between the Joint Stock and Charley Moore's grocery caved in Tuesday night. The city officials say they will not be responsible for any accidents to people using this street before it is repaired.

ENJOYABLE AFFAIR.

The Washington's Birthday entertainment given by the ladies of the First Methodist Church at the home of Mrs. Alice Amberg, on last Thursday night, was an enjoyable affair. A program consisting of songs, piano solos and duets, readings, and contests, was a feature of the evening and a general good time was had by all present. A silver offering was taken at the door which amounted to about forty dollars. Refreshments consisting of boiled custard and angel food cake were served.

SALESMAN WANTED.

Thoroughly reliable man to act as our representative at Hickman. The capital, experience and reputation of the largest real estate organization in the world, established in 1906 will be behind you and your success is assured. We advertise in papers with combined circulation of over 50,000,000, receive thousands of inquiries from property buyers daily, have sold more than 30,000 improved farms and our business is capable of paying \$3000-\$7500 yearly. If you have been successful in other ventures and enjoy the confidence and respect of your townsmen, write stating all qualifications in first letter. E. A. Strout Farm Agency, Inc., 928 Marquette Bldg., Chicago, Ill. 1c

MINERALS FORM HUMAN FOOD

Fact Which in All Probability Will Give Some Surprise to the Ordinary Individual.

You might be surprised for a moment if you were told that mankind lives entirely upon stones, metals and other minerals. But it is true.

Our food is of two kinds—animal and vegetable, and the first is really the essence, so to speak, of the second, for all our food animals make their flesh by eating grass and other plants. Plants, then, form the food supply of all other living things.

But how do plants get their food? They live entirely on minerals obtained from the soil, and on chemicals distilled from the air. Our bodies need these chemicals and minerals, but we cannot use them directly; the only two that we can use in their crude form are water and salt. All the others must be worked up into different forms, and this is done by plants.

Their roots bore down into the soil, breaking up small stones and extracting from them the minerals that are needed for their—and our—existence. These they transform into substances that animals can eat.

Schoolroom for One Family.

Pete Yousey owns a lumber camp in the Adirondacks, has five children, three of school age and the others almost ready for school and lives eight miles from the nearest school. Mr. Yousey is also a school trustee. His youngsters could not get to school in bad weather, so Mr. Yousey brought the school to them. One room on the second floor of his house has been remodeled, the district has engaged a teacher, and there school is held every school day in the year. Incidentally, Mr. Yousey's children are the only ones in the neighborhood and his house is the only one for miles around, so the teacher rooms and boards there.

CONSIDERATE GIRL.

"Did you scream when he tried to kiss you?"
"No, there's a poor man in the next flat who is very sick."

Exchange Professors.

Spain is considering a proposal from the Belgian government for the exchange of professors and students between Spain and Belgium. According to the suggested arrangement the Spanish and Belgian professors will continue to draw their salaries from their home governments and institutions, and will receive in addition a bonus from the governments to which they are sent. Arrangements are under consideration also for a harmonization of the scholastic requirements of the Belgian and Spanish universities, in order that students may receive credit in their own institutions for courses taken abroad.

Pointer for Parents.

Mrs. Flatbush—How did you come to decide on a name for the baby?

Mrs. Bensonhurst—Well, we began at A, and thought of all the names beginning with that letter; then we took B, and so went through the whole alphabet.

"But the child's name is Alice, I thought."

"So it is. When we got as far as Z we went back and began all over again at A."

Britain's Motor Cars.

The number of motor vehicles of all kinds registered in Great Britain from Jan. 1 to Aug. 31, 1921, was 870,782, and the gross amount of taxes collected was £9,876,105, which is distributed as follows: England and Wales, £8,777,863; Scotland £888,227; Ireland, £210,015.

W. M. Kerrick, of Louisville, is in the city on business.

Seed Potatoes and Garden Seed of all kinds.—Joe Morris & Co. 1c

On last Friday afternoon from 2:30 to 5, little Miss Margaret Mason French entertained quite a number of little friends in celebration of her fourth birthday. Different games were played and stories were read. Refreshments of brick ice cream and cake were served and as favors pretty boxes of candy were given. The guests were Austin Barry, Tansel Clark, Alice Amberg, Charles Amberg, Ruth Gordon Stokes, Alice Remmenberg, Mary Parks Ellison, Frances Walker, Katherine Creason, Jeannette Horine, Martha Stevens Maddox, Emma Lloyd Talley, Ruth Sanger, Dorothy Hill Peavler, Sarah Peavler, Elizabeth Bondurant, Nilla May Bondurant, Louise Stone, Agnes Goadler

Johnson, Hilda Dale Spradlin, Jane Reid, Frances Amberg and Ruth Horine.

Mr. and Mrs. Goadler Johnson have returned from a week's wedding trip to Louisville and other points.

Col. C. L. Walker was in Paducah and Louisville Tuesday and Wednesday on business.

WHAT TO DO FOR COLDS AND FLU

For colds, grippe, flu and to prevent pneumonia, take Mendenhall's Chill and Fever Tonic, a pleasant substitute for quinine, combined with a laxative cough syrup. Mrs. Lula K. Roach, Drifton, Fla., writes: "My husband had a severe attack of flu, coughed terribly, was treated by our family physician and tried different cures but got no better. I then tried Mendenhall's Chill Tonic, using two bottles. He completely recovered in about ten days. Our family physician now uses your chill tonic." We authorize druggists to guarantee Mendenhall's Chill and Fever Tonic, better than any other.

Of course, it's the corset that does it. Tho' I couldn't expect you to know. It's the corset they call the "Live Model" And it's other name's K-A-B-O.

LOST—Gold triangular pin, initials "C. G. H." on front, on buck name, Alice Owens. Reward offered for its return. 1c

CAYCE NEWS

interesting Items by The Courier's Special Correspondent.

Mrs. John Varden spent Thursday with Mrs. E. A. Mayfield.

Mr. and Mrs. Joel Moss came Sunday to see Mrs. Pruett.

Mr. and Mrs. Jordan and daughter came Monday to attend the funeral of Mr. Bill Pruett.

Estell Wade spent Wednesday night with Lois Mayfield.

Clarice and Evelyn Bondurant spent the week-end with Clyde Burnett and family.

Little Madeline Lunsford left Tuesday with Dr. Naylor and others to go to the hospital at Cairo for an operation for appendicitis.

Mr. and Mrs. Lester Brown and Miss Ethel Oliver spent Tuesday with Mrs. J. W. Naylor.

Lois Mayfield spent Thursday night with Christine Jones.

Mrs. Lottie Threlkeld and Mrs. Fannie Linder were at the funeral of Mr. Pruett Monday.

Mr. and Mrs. A. W. Fowler and children, Willie Searce and Miss May-

me Asbell went to a show Wednesday night at Fulton.

Mrs. Willie Milner has been visiting her mother, near Jordan, the past week.

Miss Nannie Davis has been visiting relatives and friends here.

Bro. Bragdon filled his appointment here Sunday.

Mrs. Lilliker, who has been real sick, is improving.

Miss Aileen Brown, who has been in Florida for several months, returned home Wednesday.

Esq. Tom Attebery has gone to Frankfort on business this week.

Mr. and Mrs. Johnnie Treas visited Mrs. J. W. Naylor Monday.

A very sad accident occurred here Saturday when the eleven o'clock train went through. Mr. Billy Pruett, who lived just south of Cayce, and who was very deaf, was going to Jordan and he had forgotten it was train time. He got on his mule to cross the track and the train struck him and killed the mule and threw him about 165 feet from the crossing. The train stopped as soon as possible and backed up to him and as he was still alive they put him on the train to carry him to Cairo to a hospital. His daughter, Miss Maggie, and daughter-in-law, went with him as the boys were all away from home. He died before the train got to Moscow but was carried on to Cairo where his body was prepared for burial and brought back on the early morning train Sunday. It was a shock to the whole community, but the neighbors and friends did all they could to help the family in every way they could. Mr. Pruett was born Nov. 6, 1896 and was married to Miss Elizabeth Jordan, on March 15, 1881. To this union were born eight children, six of whom survive, James, William, Harry, Noble and Maggie. Mr. Pruett was not a member of any church but was a reader of the Bible and believed in the Methodist Church. He was a faithful husband and a kind and loving father, a good neighbor and will be missed in the home and community. The funeral was held Monday morning at ten o'clock with burial at Beulah, near Union City.

Mrs. Edna Alexander visited her mother Thursday.

Miss Mal Asbell spent Saturday night with her sister, Mrs. Lotti Koonce and attended the play.

The Community League gave a play Saturday night "Aunt Dinah's Quilting Party" at the school house, which was very good. Owing to inclement weather they only realized \$32. They are requested to give it again Wednesday night and at Crutchfield Saturday night.

"The Strange Case of Cavendish"

ASK YOUR DEALER FOR FREE COPY

A girl reporter from a New York paper, in the line of duty, becomes mixed up in a murder mystery, which takes her to Bear Creek, Colorado, where she finds herself beset with danger. Surrounded by enemies, confronted with baffling criminal intrigue, Stella Donovan, though a tenderfoot, proves herself in courage and resourcefulness as good as the best. Incidentally she discovers she can, when need be, use a gun effectively and that she is in love with big Jim Westcott.

A good clean story, full of action, with a thrill in every chapter. The kind of a story that once begun one just has to finish.

ROCK THAT RESEMBLES LUMBER

Tufa, a volcanic ash rock, with properties possessed by no other stone, is being quarried near the town of Mount Angel, Ore., the only place in the United States where it has been found in sufficient quantities for commercial use. Deposits in Italy and Germany have been used for building purposes for many years, but the Oregon tufa is lighter than the European and has other special characteristics. The stone is first blasted out and then is hauled to a mill and handled like lumber. It is cut into blocks or "boards" of any desired dimensions. Saws, planers and drills are used on it exactly as in a lumber or planing mill. The finished product closely resembles lumber, but is cut only in short lengths. It is a light gray color, with spots of white running through it, and weighs only 80 pounds to the cubic foot, about one half the weight of common building stone.

A peculiar characteristic of the Oregon tufa is that it can be nailed. Nails are driven into it as easily as into oak and other hard woods, but are harder to pull out. Tufa furniture, nailed together, has been made experimentally. It is regularly used for fence posts, moldings, sills and many other purposes where nailing is required. Recently it has been discovered that when pulverized it makes a soft, velvety powder, which is an excellent filler for rubber. It is predicted that it will supplant all other materials for this purpose, thus utilizing the refuse.

The Mount Angel tufa field lies at an elevation of 1,500 feet and covers an area of over 1,500 acres, varying from fifteen to thirty-five feet in depth. It is covered with a layer of earth and basaltic rock. This peculiar stone is composed of pure volcanic ash, free from lava, which was thrown up by some early volcanic disturbance, and solidified during the course of ages. The charred remains of trees are found imbedded in the rock, erect as they were when the ash fell about them. The source of the ash cannot be determined, though it is suggested that it may have accompanied the eruption which formed the bed of Crater Lake in Oregon.—Popular Mechanics.

Illinois Central System Says Service is Key-note in Handling Freight

The freight service of the Illinois Central System is founded upon prompt and regular movement of freight and the considerate treatment of patrons' wants by an organization which strives to render a service of satisfaction. We hold those to be the requisite elements of freight service.

The Illinois Central System is among the leading railroads of the country in handling perishable freight. Fruits from the tropics arriving by steamship are moved north from the port of New Orleans in solid trainloads for distribution to marketing centers throughout the country. Domestic fruits and vegetables produced in Louisiana, Mississippi and Tennessee are loaded at stations on our lines and shipped to principal points throughout the United States and Canada, moving largely in solid trainloads. Vegetables from the Rio Grande valley of Texas move in substantial volume through the Baton Rouge gateway and are handled by the Illinois Central System from Baton Rouge to principal points in the North and East. Solid trainloads of meat and packing house products are handled between Omaha, Sioux City and Chicago. Through trains from Council Bluffs to Chicago carry California vegetables and fruits.

Transportation of quality and quantity is an essential for the well being and development of trade in commodities commonly classed as perishable freight. Without rapid and dependable transportation service consuming centers would have to depend on supplies from relatively nearby points of production, and trade generally would be contracted. The accurate maintenance of schedules is important in handling perishable freight. As an example of the kind of service rendered by the Illinois Central System, it is worthy to note that during the past six months our fast freight trains handled perishable and other high class freight long distances have made scheduled early morning deliveries 99 per cent on time. A bureau in the office of our car accountant at Chicago receives telegraphic advices of the movement of cars loaded with perishable freight and is able at any time to furnish shippers of such cars or consignees the exact location and probable time of arrival or delivery to connecting line.

Fast merchandise trains are operated out of all the principal cities on the Illinois Central System on schedules which enable specialization in forwarding the freight the same day received.

The Illinois Central System also ranks among the leaders of railroads in originating coal and lumber traffic. This class of traffic does not require such rapid movement as perishable freight and merchandise, but does require regular and dependable service, which we are enabled to give through a well equipped transportation plant and special attention to the freight movement. To a large extent these commodities are classified into solid trains and handled long distances intact, thus minimizing detention at terminals.

Not all cars are handled without delay. Delays occur from causes beyond our control—others from causes under our control. The delays, however, are extremely small, taking into consideration the thousands of cars handled daily. A loaded car found delayed is immediately placed in a preferred class, through special carding and notation on waybill, and handled in fast freight trains to avoid further delay and, if possible, to overcome that already sustained.

We are continually adding to our equipment in the effort to keep abreast of traffic demands. We own 1,700 locomotives and 69,127 freight cars. Since the return from federal control we have purchased and received 150 locomotives, 1,000 refrigerator cars, 300 stock cars and 200 flat cars. We have recently placed orders for 2,000 additional gondola cars and 1,000 additional refrigerators.

We are striving constantly to perfect all departments of our service. We realize that our worth to the public is measured by the service we give, and we invite the public to call upon us for any service, small or large.

Constructive criticism and suggestions are invited.

C. H. MARKHAM,
President Illinois Central System.

MANY WRITERS PLAY GOLF

Authors have their hobbies as well as their style. E. Phillips Oppenheim is an enthusiastic golfer; Israel Zangwill is an expert chess player; Marie Corelli is devoted to music and plays several instruments. Cricket appeals to Sir J. M. Barrie and Sir Arthur Conan Doyle, while yachting is the favorite pastime of "Q" (Sir Arthur Quiller Couch).

Work and play are combined by Sir Rider Haggard. He enjoys traveling in strange lands, and his adventures have been as thrilling as his romances. Big game hunting and traveling are the principal pastimes of Cutcliffe Hyne, the creator of Captain Kettle. Max Pemberton used to be devoted to cycling, but, like many another, he has fallen victim to the little white ball and now devotes most of his spare time to golf. Arnold Bennett is a devotee of art and has a collection of modern paintings.—Detroit News.

FOR RENT—6 room house with two porches, big yard, garden, smoke house, hen house, and good cistern, on gravel road. Also twenty good work mules for sale. Some coming two year olds, will swap for aged mules. 800 bushels of Burt Oats, very fine for seed, for sale, in sacks.—Julian Choate. 36trc

Miss Mollie Bourne, of Union City, has returned from the St. Louis markets and is again in charge of the millinery department of Smith & Amberg's store.

Seed Potatoes and Garden Seed of all kinds.—Joe Morris & Co. 1c

IF WOMEN ONLY KNEW

What a Heap of Happiness it Would Bring to Hickman Homes

Hard to do housework with an aching back.
Brings you hours of misery at leisure or at work.

If women only knew the cause—that Backache pains often come from weak kidneys.

'Twould save much needless woe. Doan's Kidney Pills are for weak kidneys. Ask your neighbor!

Read what a Hickman citizen says: Mrs. Walter McLaughlin, W. Hickman St. says: "Several years ago I had an attack of kidney complaint. I took Doan's Kidney Pills after being advised to do so by a neighbor who had taken them. I was all run down and felt tired and languid all the time. My back ached and I had pains in my side. I wasn't strong enough to do my housework. I took Doan's Kidney Pills and it wasn't long as I felt as well and strong as ever. I certainly think Doan's are a fine kidney medicine and I am glad to recommend them."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. McLaughlin had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Tribal government was the only organization known to the earlier historic periods.

During a terrific storm, while on the English Channel Hadyn composed his "Creation."

REMINISCENCES

FIFTY YEARS AGO

"The mail route from Dyersburg to Hickman will go into successful operation just as soon as the commissions are issued."

The General Assembly had reapportioned the congressional districts according to the census of 1872. The following counties were in the First district: Fulton, Hickman, Calloway, Marshall, McCracken, Ballard, Trigg, Lyon, Crittenden, Livingston, Graves and Union.

The Legislature granted a charter to the Elizabethtown & Paducah railroad, fixing Hickman as the river terminus of the road.

"The school of Routhae & Cowgill has commenced the spring term with an increased enrollment."

"It is estimated there has been enough corn shipped at Hickman this year via the Nashville & Northwestern railroad to supply more than half the Southern states."

W. L. McCutchen paid out to one firm, L. Adams, Jr., over \$23,000 for staves.

"Gid Garrett and Dick Isler were shot at while hunting in the woods on Wednesday. No particulars inquired for."

The Hickman Cornet Band was preparing to give a series of concerts and tableau entertainments, and the city hall was being fitted up with stage, etc.

TWENTY-FIVE YEARS AGO

"An old soldier in Vincennes, Ind., refuses to take a pension because his health is good and he does not want to be a burden to the government."

William McKinley had just been inaugurated president.

Alex Brown of Cayce announced as a candidate for circuit clerk; J. F. Royster made announcement for the same office.

"B. T. Davis has purchased the residence of Mrs. Mollie Prather and will go to housekeeping."

"The farmers are getting about their spring work, such as fixing fences, sowing oats, etc."

"Buck Bros. have sold their entire stock of jewelry, etc., to Ed Meyer, who will continue the business at the old stand. The repair department will be in charge of Charles G. Schenker."

"E. E. Reed of Wickliffe has opened up a stock of dry goods, millinery, etc., in the Buckner building."

Dr. J. T. Baker and Miss Kate Stubbs were married at Paducah.

The city council granted permission to the trustees of Hickman College to fence the ground opposite the college and use the same for a playground.

STUDIOS ON WALLS OF ROME

Practical Plan to Provide Housing for Artists in the Confining of the Eternal City.

An attempt is being made by the commune of Rome to remedy the studio shortage—which is only one phase of the general housing crisis—by the original plan of allotting some of the more habitable towers and turrets in the ancient city walls to various artists.

Many of these old towers can be made perfectly habitable, and when fitted with electric light and comfortable furniture will provide large and picturesque studios for a number of painters. The "master of the walls," Signor Francesco Randone, has instituted a school of educative art for children in the tower of Bellisarius.

The new artist tenants of the turrets and towers will have to assume the nominal duty of keepers or custodians in addition to their responsibility as tenants, but this duty will be only a formal one. Some of the new studios, though they have the disadvantage of being a little distant from the center of the city, will have fine views over the Campagna and will form extremely picturesque abodes. A kind of summer house in the Villa Borghese (the Hyde park of Rome) has been offered to a widely known artist without a studio.—Living Age.

India's New Capital.

What the relatively young United States did in founding Washington as its capital, and what the still younger Australia has undertaken in creating its new capital city, Canberra, Great Britain is doing for age-old India by building a new seat of government near Delhi, says a bulletin issued by the National Geographic society.

In Australia the new city is being carved from a practically untouched wilderness; and in America Washington was laid down where a few freshly cleared farms were hemmed in by wooded hills. In India New Delhi is being built on ground where cities have risen and passed away through the centuries, and about which are situated beautiful and striking monuments of one of the world's most powerful empires.

When the bowels are constive the waste matter ferments, producing a gaseous condition that is disagreeable. To remove it quickly a dose of Herbine is needed. It does the work thoroughly and pleasantly. Price, 60c. Sold by all druggists.

The family of James Watt, inventor of the steam engine, had followed navigation and mathematics for more than 100 years.

The KITCHEN CABINET

(© 1920, Western Newspaper Union.)

You have eyesight and hearing and speech. Your limbs are sound. You use your arms and your legs and your hands as freely as ever. What in creation are you waiting about? If one crowd is crowded, go where they need a crowd. If one resource fails you, invent another.—Kaufman.

IN CHESTNUT TIME.

The cooked chestnut is not nearly so popular as it deserves to be. Any time or labor entailed in its preparation is amply repaid by the result.

Chestnut Custard.—Blanch, boil until soft, and mash through a colander a quantity of chestnuts. To one cupful of the chestnut pulp add three egg yolks with one beaten white of egg, one cupful of milk and half a teaspoonful of vanilla extract, and sugar to taste. Pour into a buttered baking dish and bake slowly.

Make a meringue with the remaining whites and two tablespoonfuls of sugar, and bake slowly on returning to the oven. Garnish with preserved cherries.

Imperial Chestnut Pudding.—Take one pint of chestnuts, one pint of almonds, two cupfuls of sugar, the yolks of six eggs, two cupfuls of cream, two cupfuls of boiling water, one pineapple or a can of the same, and one pound of candied fruit. Shell and blanch the chestnuts and cover with boiling water and cook until tender. Drain and press through a colander. Cut the candied fruit into bits, shell and blanch the almonds. Boil the sugar and boiling water for a quarter of an hour, then add the beaten yolks of the eggs, remove from the fire and beat until cool. Now add the fruit, cream, almonds, chestnut flavoring and a quarter of a cupful of orange juice. Mix well and freeze. Pack for five hours to ripen.

Mashed Chestnuts.—These may be served as a vegetable or as a cake filling. Put boiled, blanched chestnuts through a ricer, season with salt, butter and cream as for mashed potatoes. For puddings add flavoring, sugar and a pinch of salt.

Chestnuts and Ham.—Place alternate layers of thinly sliced cooked ham and mashed chestnuts in a baking dish. Season with minced marjoram and sage, salt and bits of butter to the top layer of chestnut pulp. Bake until brown on top.

Nellie Maxwell

Piles Cured in 6 to 14 Days

Druggists refund money if PAZO OINTMENT fails to cure itching, blind, bleeding or protruding piles. Instantly relieves itching Piles, and you can get restful sleep after the first application. Price 60c.

LODGE NOTES

Hickman Chapter No. 289, Order of the Eastern Star, meets the second Friday evening of each month at 8 o'clock at the I. O. O. F. Hall. Visiting sisters and brothers are cordially invited.—Mrs. Annie Hale, Worthy Matron; Mrs. Bertha Crutchfield, Sec'y.

OPTICIAN
RELIABLE JEWELER

THE COUNTY AGENT'S COLUMN

Cut Their Tails Off Early.

A lamb with a long tail looks like a Russian Bolshevik and what's more, he really is one. The tail is a perfectly useless piece of machinery and highly detracts from his good looks. While you are at the operation, castrate them also. A castrated lamb will weigh from 10 to 15 pounds more when they are marketed, their flesh is better and the price is higher.

I am ready to help any farmer dock and castrate lambs who does not understand the operation. Pine tar (comparatively thick) is one of the best disinfectants as it is effective longer. The County Agent helped dock and castrate over 500 lambs last year and where this disinfectant was used not a single death occurred and some were docked and castrated late in the spring. If you want to get the most profit out of this practice do it while they are young.

Spray and Prune Now.

Spray now with lime sulphur for scale. Prune apple trees lightly and peach trees heavily. Call on the County Agent for assistance if you do not understand these operations.

Poultry.

Early pullets pay, they lay the golden eggs during the winter days. Head your flock with high producing cocks or cockerels. Your male bird is 10 to 12 times as important as the female, therefore get the best male bird. Mate him with from 10 to 12 hens or pullets. Dust the old hen with sodium fluoride before setting her. Get your white rock eggs at the banks now.

Sow That Pasture Now.

Oats and rape make the best spring pasture for pigs and sheep. Oats, 1 bushel; rape, 6 pounds per acre. Sow now. A good permanent pasture mixture: Orchard grass 8 pounds, red top 2 pounds, alsike clover 3 pounds, Japan clover 5 pounds per acre. This is an excellent permanent pasture mixture. It has variety, comes at different seasons and improves the soil.

Soy and Jap Will Do It.

They will grow without lime, without inoculation and on poor soil. If money is tight and you can't sow that patch of alfalfa or clover because you can't get the lime, just remember that soy beans and Japan clover are excellent legumes; will both come wherever you sow them. Sow Jap now, 12 pounds per acre. Soy beans are a good cash crop. They yielded from 18 to 20 bushels of beans per acre last year and a ton of good hay. The beans sold for from \$1.55 to \$1.75 per bushel. Sow Jap for pasture and to stop up the gullies. Sow soy beans in corn, for seed and to hog off for soil improving purposes. O. L. Cunningham, Co. Agent.

THE UNCERTAIN RACES

"When I go to the races I get the lady I'm with to shut her eyes and jab her hatpin through a name on the programme. Then I play the horse."
"Trouble is, even that system isn't infallible."

The Symbolic Eagle.

The eagle stood for two things in ancient symbolism. The Greek name for the monarch of the air was a word meaning "rapid motion." The deeply mystic Hebrews, after watching the great bird sitting motionless, contemplating the sun, gave it a name which meant "meditation." In early Christian art the eagle became the symbol of spiritual power, because it was able to soar tirelessly through the highest places. The lion was the symbol of human pride and temporal power.

The Woman's Missionary Society of the Methodist church will hold a special social service meeting Monday afternoon at 3 o'clock, at the parsonage. Mrs. Sims, public health nurse, will be the principal speaker. All the ladies of the church are invited and others who are interested in community welfare.

W. H. Baltzer and daughter, Mrs. K. A. Talley, returned last Friday from several days' stay in the St. Louis markets.
